

Foodbank continues to be a support to local people who are in need and the way you have responded over the last few weeks has been incredible. We had reached a point where our cupboards were almost bare and when a plea for help went out we never envisaged the level of response we would get. We are pleased to say that our cupboards are now looking a lot more healthy and whilst we continue to

need food we are in a much better position to get us through to the harvest season.

We have always wondered just how much food we use. You may find it helpful to look at the table over the page to see how much we distribute in a month. It may also help you when you wonder what you should buy to support us (although we still are very stocked up on pasta, tea bags and soup and don't need these items).

Thank you for continuing to support us in every way by volunteering, giving and praying. There is a real sense of this being a church community project which reaches out to the people of Horley.

Every blessing.

Diane Collins

Churches for Horley Foodbank.
